b. Quality of Take: Satisfactory

(1) Resolution - ON not available (due at NPIC on or about 21 September); consequently, all evaluations made from D. P. Majority of take was classified by P. I. s as "best ever seen on Type I photography"; however, NPIC did report about 10% of photography from aft optical system showed some degradation of resolution. Frame ephemeris indicates this reduction in resolution may be attributed to configuration being caged. There was also some indication of exposure variation but this could have been caused by processing. No other discrepancies noted.
